

IT MAY BE THE SAFEST DECISION YOU MAKE

TRAILER
SOLUTIONS

When you are pulling hundreds or even thousands of pounds behind you, a loose trailer can be extremely dangerous. Once a trailer separates from the vehicle, the trailer can continue moving until it slows down, crashes or worse, cause a deadly accident. A breakaway kit is essential for safety when towing a trailer. UPG Breakaway kits are designed to bring trailers safely to a stop by activating the breaks should a trailer disconnect from the vehicle.

Side-Load
